

Feng Chun (Phoebe) Wang

Berkeley, CA | 512-954-3515 | phoebe_wang@berkeley.edu | linkedin.com/in/phoebewang59 | phoebewang59.github.io

EDUCATION

University of California, Berkeley

M.A. in Statistics & Data Science

Berkeley, CA

Expected May 2027

The University of Texas at Austin

B.S. in Behavioral and Social Data Science

Austin, TX

Dec. 2025

GPA: 4.0/4.0 | Certificate: Applied Statistical Modeling | Minor: Business

PROFESSIONAL EXPERIENCE

Numi | Dubai, UAE | Junior Data Analyst

May 2025 – Aug. 2025

- Developed **4 user personas** from fintech market research, identifying the highest-potential target segment and recommending it to the CEO to guide early product positioning and marketing decisions
- Built 12–36-month **financial growth projections** and **fundraising scenario models** (\$1.5M, \$10M, \$20M) in Google Sheets, with analyses incorporated into strategic planning and investor discussions
- Constructed a **combined sentiment and price dataset** around major crypto events by analyzing public reactions in R, proposing data inputs for the AI coach's personalized user guidance

TIES Lab | Austin, TX | Data Science Intern

Jun. 2024 – Aug. 2024

- Independently conducted a research project** using **multilevel regression and text analysis in R** to examine mood and language predictors of conflict intensity; presented findings and implications to the PI and research team
- Analyzed and validated **12,600 rows across 33 moods/behaviors** in R, identifying coding inconsistencies that enabled the team to correct human errors and improve data reliability
- Tested **1,500+ research prompts** on a participant-facing app with graduate researchers and the PI, identifying UX and data integrity issues to ensure a smooth launch and reliable data collection

Dept. of Statistics and Data Sciences | Austin, TX | Undergraduate Teaching Assistant

Jan. 2023 – Dec. 2024

- Taught **applied data analysis in Excel and Data Analysis ToolPak** in a 100+ student course, demonstrating statistical analysis, Pivot Tables, and visualizations using real-world datasets with 200+ observations
- Troubleshooted and resolved diverse analytical problems** across statistical analyses and Excel workflows, providing tailored solutions that improved analytical accuracy and understanding
- Led Q&A sessions and exam reviews for **400+ students**, breaking down complex statistical concepts and adapting explanations to individual learning needs; **invited back to lead reviews after completing the role**

PROJECTS

Psychomotor Tracing Analysis of 3D Hand-Tracking Data

Aug. 2025 – Dec. 2025

- Collected **3D hand-tracking data** using a Leap Motion Controller to measure participants' movements during tracing tasks and examine their relationship with attention and cognitive performance
- Developed a **Python data processing pipeline** to record, clean, and visualize millisecond-level 3D motion data, extracting position, velocity, and acceleration features and applying filters to reduce noise and detect movement onset

Reddit Mental Health Sentiment & Network Analysis

Mar. 2025 – Apr. 2025

- Analyzed **757 Reddit posts in R** using sentiment and network analysis, finding positive discussions formed hub-centered clusters while negative discussions spread in chains, revealing distinct interaction patterns by sentiment
- Applied **balance theory and triad analysis** to examine emotional shifts, finding unbalanced interactions often shifted toward positive sentiment, while user engagement levels showed no strong relationship with sentiment

SKILLS

- Programming:** Python, R, SQL
- Data Science & ML:** Regression, Multilevel Modeling, Sentiment Analysis, Network Analysis, Feature Engineering
- Libraries:** pandas, NumPy, scikit-learn, tidyverse, matplotlib, seaborn, ggplot2
- Tools:** Codex, Claude, Git/GitHub, Jupyter Notebook, Tableau, Excel, Google Sheets
- Languages:** Mandarin Chinese (native), English (native)
