

Feng Chun (Phoebe) Wang

Berkeley, CA | 512-954-3515 | phoebe_wang@berkeley.edu | linkedin.com/in/phoebewang59 | phoebewang59.github.io

EDUCATION

University of California, Berkeley
M.A. in Statistics & Data Science

Berkeley, CA
Expected May 2027

The University of Texas at Austin
B.S. in Behavioral and Social Data Science

Austin, TX
Dec. 2025

GPA: **4.0/4.0** | Certificate: Applied Statistical Modeling | Minor: Business

PROFESSIONAL EXPERIENCE

Numi | Dubai, UAE | *Junior Data Analyst*

May 2025 – Aug. 2025

- Developed **four user personas** from market research on financial behaviors and fintech adoption, enabling leadership to visualize target audiences and guiding early discussions on product and marketing strategy
- Built 12–36-month **financial growth projections** and **fundraising scenario models** (\$1.5M, \$10M, \$20M) in Google Sheets, with analyses incorporated into **strategic planning and investor discussions**
- Performed **sentiment analysis** in **R** on public reactions to major crypto events, complementing financial trend analysis and outlining a framework for an AI coach integrating sentiment and financial data to generate user insights

TIES Lab | Austin, TX | *Data Science Intern*

Jun. 2024 – Aug. 2024

- Independently conducted a research project applying **multilevel regression models** and **text analysis in R** to examine mood, behavior, and conflict intensity; found that negative moods increased conflict intensity, while “we-words” unexpectedly amplified rather than buffered conflict
- Wrangled data and computed descriptive statistics in **R** for **33 moods/behaviors across 12,600 rows**, identifying coding inconsistencies and enabling the team to correct human errors and **improve data reliability**
- Managed and quality-checked **1,500+ prompts** on a participant-facing app with graduate researchers and the PI, identifying errors affecting user experience and data integrity to ensure a **smooth launch and reliable data collection**

Dept. of Statistics and Data Sciences | Austin, TX | *Undergraduate Teaching Assistant*

Jan. 2023 – Dec. 2024

- Mentored students in **Excel** and **Data Analysis ToolPak** to perform descriptive and inferential statistics, demonstrating **Pivot Tables and visualizations on 200+ row datasets** and troubleshooting analysis issues to improve accuracy and confidence in applied data analysis
- Led interactive Q&A sessions and exam reviews for 500+ students, providing tailored practice and live support that clarified complex statistical concepts and strengthened student performance

PROJECTS

Psychomotor Tracing Analysis of 3D Hand-Tracking Data

Aug. 2025 – Dec. 2025

- Collected **3D hand-tracking data** using a Leap Motion Controller to measure participants’ movements during tracing tasks and examine their relationship with attention and cognitive performance
- Developed a **Python data processing pipeline** to record, clean, and visualize millisecond-level 3D motion data, extracting position, velocity, and acceleration features and applying filters to reduce noise and detect movement onset

Reddit Mental Health Sentiment & Network Analysis

Mar. 2025 – Apr. 2025

- Analyzed **757 Reddit posts in R** using sentiment and network analysis, finding positive discussions formed hub-centered clusters while negative discussions spread in chains, revealing distinct interaction patterns by sentiment
- Applied **balance theory and triad analysis** to examine emotional shifts, finding unbalanced interactions often shifted toward positive sentiment, while user engagement levels showed no strong relationship with sentiment

SKILLS

- Programming:** Python, R, SQL
- Data Science & ML:** Statistical Modeling, Text & Sentiment Analysis, Network Analysis, Feature Engineering
- Libraries:** pandas, NumPy, scikit-learn, tidyverse, matplotlib, seaborn, ggplot2
- Tools:** Tableau, Git/GitHub, Jupyter Notebook, Excel, Google Sheets
- Languages:** Mandarin Chinese (native), English (native)
